

Dataset Description

This project uses a transformed Housing Market dataset in CSV format for analyzing housing prices and property characteristics using Tableau Desktop Public.

Attribute	Description
Dataset Name	Transformed_Housing_Data2 3(4).csv
File Format	CSV
Total Records	21,598 (after data cleaning)
Number of Fields	33
Domain	Housing Market Analysis
Visualization Tool	Tableau Desktop Public
Key Attributes	Sale Price, Bedrooms, Bathrooms, Floors, House Age, Basement Area, Renovation

Dataset Overview

The dataset contains residential housing information including property prices, structural features, renovation history, and location details. During preprocessing, duplicate records were identified and removed to improve data quality. The cleaned dataset was then used to create KPI cards, charts, dashboards, and storyboards in Tableau Desktop Public.
